PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience designing, building, and deploying production-grade web applications using React.js, Node.js, REST APIs, and PostgreSQL. Committed to writing clean, scalable code and crafting high-quality user experiences that address real-world challenges.

Demonstrated ability to thrive in fast-paced, agile environments while collaborating effectively with cross-functional teams to deliver projects on schedule and within scope. Adept at diagnosing complex technical problems and implementing efficient, maintainable solutions with a continuous focus on optimizing application performance and reliability.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, HTML5, CSS3, responsive component-driven UIs
Backend	Node.js, Express, PHP Laravel, Python Django, RESTful API design
Languages	JavaScript, TypeScript, Java, C, PHP, Python
Databases	PostgreSQL (Prisma ORM), MySQL, MongoDB
DevOps / CI-CD	Git, GitHub, Vercel deployment pipelines, environment provisioning
Platform Ops	Environment provisioning, bug triaging, deployment support, incident response
Practices	Peer code review, technical documentation, agile ceremonies, cross-functional collaboration
Security & Auth	JWT authentication, Google OAuth, role-based access control, secure coding practices

WORK EXPERIENCE

Software Developer | **Abidors** March 2023 – June 2023

- Built a full-featured platform using the PERN stack (PostgreSQL, Express.js, React, Node.js).
- Developed secure APIs and optimized queries, improving performance by 30%.

- ▶ Led API design, business logic, and frontend-backend integration.

Platform Support Intern | **Andela Rwanda** *Jul 2023 – Sep 2023*

- ▶ Maintained and iterated on live production web platforms, diagnosing and resolving frontend and backend bugs to preserve service continuity directly analogous to sustaining AI feature reliability in clinical environments.
- ▶ Triaged deployment issues, escalated critical incidents to senior engineers, and documented resolution steps establishing disciplined incident-response habits essential for fast-moving health-tech release cycles.
- ▶ Maintained structured audit-trail logs and knowledge-base articles, enabling the team to iterate on fixes without regressions a practice transferable to AI feature QA and clinical validation documentation.
- ▶ Collaborated across engineering and product functions in an agile setting, practising iterative delivery and structured handoffs under senior mentorship.

Software Engineering Track | **Andela Rwanda — Technical Leadership Program** *Nov 2022 – Jun 2023*

- ▶ Completed a highly competitive, intensive programme in software development, data structures, algorithms, and full-stack application architecture.
- ▶ Designed, built, and deployed a full responsive portfolio website end-to-end: React.js frontend, Node.js backend, PostgreSQL data layer, and automated CI/CD via GitHub + Vercel branch-protection workflows.
- ▶ Iterated features rapidly based on mentor and peer feedback, building strong habits around user-driven development.
- ▶ Participated in cross-functional team projects with agile ceremonies (stand-ups, sprint reviews, retrospectives), practising collaborative, iterative delivery.

EDUCATION

BSc in Computer Science | **INES Ruhengeri** *2024 – 2026*

- ▶ Core coursework: algorithms & data structures, operating systems, databases, software engineering providing rigorous theoretical grounding for AI platform and data-infrastructure work.
- ▶ Dissertation completed and successfully defended (June 2026); graduation pending.
- ▶ Active member and session organiser of the Coding Club, leading collaborative problem-solving and algorithm challenges for peers.
